

MAGNETIC DRILL MACHINE

MORSE TAPER SLEEVE & EXTENSION SLEEVE

High quality Morse Taper Sleeves and Extension Sleeves designed for magnetic drill machines. Manufactured from premium grade steel for superior strength, accuracy and durability.

PREMIUM QUALITY

Manufactured from high grade alloy steel for maximum wear resistance and long tool life.

HIGH PRECISION

Precisely engineered for accurate fitting, smooth operation and better drilling performance.

DURABLE & RELIABLE

Heat treated and precision ground for excellent strength, durability and reliability.

MORSE TAPER SLEEVE

- Used to adapt Morse Taper shank cutters to magnetic drill machines.
- Available in various Morse Taper sizes.
- Precision ground for perfect alignment and rigidity.
- Ideal for secure and accurate drilling operations.

EXTENSION SLEEVE

- Used to extend the depth of cutting tool in magnetic drill machines.
- Provides extra reach for deep drilling applications.
- Strong, durable and vibration resistant.
- Available in various lengths to suit your requirement.
